EDUCATION

2023 - Present	B.Tech in CSE AIML at ABES Engineering College, Ghaziabad	(CGPA: 8.002/10)
2021	Class 12th CBSE Board	82.33 %
2019	Class 10th CBSE Board	84.66 %

TECHNICAL SKILLS

- **Languages:** Java, Python, C, JavaScript
- **Backend:** Spring Boot, REST APIs, Flask, Spring Data JPA, Microservices
- **Databases:** MongoDB, PostgreSQL, MySQL
- **Core CS:** OOP, Data Structures & Algorithms, DBMS, Operating Systems
- **Tools:** Git, GitHub, Maven, IntelliJ IDEA, VS Code, Postman
- **Frontend:** React.js, HTML, CSS
- **Concepts:** API Design, Scalability, Caching, Problem Solving, Debugging

PROJECTS

Personal Finance & Expense Analyzer with AI

[GitHub](#)

Java — Spring Boot — MongoDB — React — Flask — REST APIs

- Built a full-stack expense management platform using Spring Boot, MongoDB, React, and a Flask-based ML microservice.
- Designed and developed RESTful APIs for expense tracking, budgeting, analytics, and reporting using Spring Boot.
- Implemented AI-powered expense categorization and a Smart Purchase Planner for budgeting recommendations.
- Designed modular backend architecture with database integration and API-driven communication between services.
- Used MongoDB for persistent storage and implemented CSV export for expense data.

Real-Time Train Tracking & Journey Assistance Platform (In Progress)

[GitHub](#)

Java — Spring Boot — PostgreSQL — Redis — REST APIs — React Native

- Building a scalable railway information platform providing train search, timetable lookup, route visualization, live train status, ETA prediction, and journey alerts.
- Designing a provider-independent backend architecture using a `RailwayDataProvider` abstraction to support multiple railway data sources.
- Developing RESTful APIs for train information, station search, route management, and live status retrieval.
- Implementing PostgreSQL-based data management and Redis caching to improve response times and reduce repeated external API requests.
- Used Git and GitHub for version control and collaborative development.
- Applying software engineering principles including modular architecture, scalability, maintainability, and clean code practices.

CODING PROFILE

- Solved **350+** DSA problems across **LeetCode** and **GeeksforGeeks**.

CERTIFICATIONS

- AWS Cloud Practitioner Essentials – AWS – Jan 2025
- AWS Academy Graduate: Introduction to Cloud – Semester 1 – AWS Academy – Jan 2025
- Yuva AI for All – NASSCOM FutureSkills Prime – Dec 2025
- Campus Ambassador BECon'26 IIT DELHI
